

Moving Logistics Forward

Ibase is a complete logistics solution covering all transport modes – road, rail, sea, and air. Its modular Transport Management System (TMS) streamlines the entire transport chain, from order entry to digital invoicing, with flexible licensing options, including SaaS. For warehousing, Ibase WMS optimizes packaging, item handling, and scanning while enabling value-added services through a tiered licensing model. Together, Ibase TMS and WMS help logistics providers save time, reduce costs, and enhance efficiency.

AI Inside

Ibase consistently relies on forecasts based on historical data throughout the entire system, as well as neural networks that allow targeted predictions about the future.

Unique Selling Points

- ▶ End-to-end transport and warehouse management systems
- ▶ Flexible workflow engine developed by us to handle complex requirements
- ▶ Simple connection to third-party systems – such as financing, customs, ERP, and CRM systems
- ▶ Naturally connected to the full addHelix spectrum

Business Process Covered

- ▶ Transportation
- ▶ Procurement
- ▶ Supply Chain
- ▶ R&D & Product Management
- ▶ Service
- ▶ Asset Management
- ▶ Compliance
- ▶ Analytics
- ▶ Application Development & Integration
- ▶ Field Service Management
- ▶ Sustainability

Customer Problems & Challenges

- ▶ General cargo integrates multiple transport modes, complex regional networks, and demanding collaborations.
- ▶ Large loads require precise planning, suitable equipment, and secure, transparent handling
- ▶ Efficient planning and monitoring ensure reliable stock, fast dispatch, and transparent, real-time information.

Smart logistics for a connected future

addHelix is a web service platform for businesses involved in transporting goods or people. It offers numerous web services such as route optimization and CO₂ calculations as well as cloud solutions for different logistics requirements. The 'addHelix Road' web solution is intuitive and tailored for transport journeys, while 'addHelix Parcel' coordinates all e-commerce processes. 'addHelix BI' helps businesses to optimize processes and make informed decisions. 'addHelix Mobile' empowers operations to ensure top notch delivery performance.

Unique Selling Points

- ▶ Comprehensive suite with innovative web services for your logistics
- ▶ AI-driven software and innovative algorithms for precise forecasts
- ▶ Dynamic plug & play solution, accessible on any system

Business Process Covered

- ▶ Sales
- ▶ Human Resources
- ▶ Manufacturing
- ▶ Supply Chain
- ▶ Service
- ▶ Asset Management
- ▶ Compliance
- ▶ Analytics
- ▶ IT Management
- ▶ Application Development & Integration
- ▶ Field Service Management
- ▶ Intelligent Technologies
- ▶ Sustainability

Customer Problems & Challenges

- ▶ Taking strategic decisions based on unreliable data and lack of transparency in the supply chain
- ▶ Management of bottlenecks by efficient utilization of means of transport and personnel while complying with legal requirements and social obligations
- ▶ Manage multi carrier implementation within the shipping process while reducing costs and enhancing customer satisfaction across multiple e-commerce channels

AI Inside

Leading optimization techniques and powerful AI solutions combined in a best-of-breed approach – for the logistics of today and tomorrow.
